

Cellulite

Body treatments continue to soar in popularity, with consumers seeking to address both the shape of their physiques and the look of their skin from the neck down. With that in mind, these protocols specifically target cellulite for smoother, more youthful-looking skin.

EMTONE Protocol

(20 min./\$700-\$800)

BTL Aesthetics

1. Gently cleanse the targeted area that will be treated (abdomen, buttocks, arms, etc.)
2. Apply cooling gel on the targeted area.
3. Attach the applicator wand to the Emtone device, and move it around in circular motions. Note: Patients will often feel a warm sensation during this process.
4. Since heat intensity is controlled by the doctor administering the treatment, adjust the heat to best meet the client's comfort levels for the remainder of the treatment.
